

Accelerate your sustainable network and supply chain decarbonization programs

Decrease carbon emissions through education, tracking and reporting with our supplier-focused software

Efficiently reduce carbon emissions by leveraging your value chain's efforts. Provide education and tools for effective emission reduction and monitor the results of your program by tracking engagement and action.

STEP 1: DEPLOY

Provide essential educational resources and tracking tools your value chain will need to reduce carbon.

STEP 2: MONITOR

Regularly analyze each supplier's engagement and contributions towards your decarbonization goals.

STEP 3: SHARE

Report on the performance of your overall program to evaluate progress and measure impact.

Decarbonize faster, smarter, and at scale — with the power of Zeigo Hub

- ✓ **Respond:** Fulfill investor expectations with definitive carbon emission reduction targets and initiatives.
- ✓ **Empower:** Give your network the tools they need to expedite their carbon reduction plans.
- ✓ **Measure:** See the results of your program by supplier, tier, or region.
- ✓ **Act:** Connect suppliers to the right action levers to decarbonize.
